

Information Governance

Redefining Knowledge Management

INNOVATIVE
DEVELOPMENT

Innovative Development LLC, a leader in eDiscovery, records management, business process improvement and legal systems integration consulting services has announced the expansion of these services to include Information Governance. Combining elements of industry best practices, ITIL, ISM, EDRM and IGRM to information governance approaches. Together with real world experience of Records Management; Information Security; IT Management and Business Process Change – ID consultants are enabling organizations to identify and gain control of their data assets and manage them efficiently to reduce risk and cost.

Our customers have utilized ID consulting services to:

- Review and document application and data portfolios
- Assess Organization Risk in Information Management
- Document corporate information policies by jurisdiction
- Identify and conduct interviews with key stakeholders
- Produce reports on Information Governance Maturity Model
- Develop strategic plans to improve Information Governance
- Create Information Governance Bodies
- Document and implement Information Disposition.

Examples of customer focused results are:

- ID leadership team has implemented Information Governance and eDiscovery Services at “Fortune 500” companies
- ID teams create and implement Information Governance policies
- ID teams provide training to client staff on Information Governance
- ID teams Implement business process changes to reduce risk & cost in Information Governance and eDiscovery.
